Projects (https://github.com/Aryanpatel2001)

Learning Management System (Full Stack)
Ahmedabad, Gujarat, IND

- Led the charge in building responsive and engaging web applications using React.js, HTML, CSS, and JavaScript.
- Worked closely with the back-end that connects the dots between the frontend and RESTful APIs built with Node.js and Express.js.
- Focused on quality by conducting thorough code reviews and pushing for clean, maintainable code.
- Implemented dynamic email templates using Node.js and EJS for personalized communication.

AI Presentation Builder (Full Stack)   Mar 2022 - Dec 2022
Ahmedabad, Gujarat, IND

- Developed an AI-powered presentation builder enabling users to create stunning presentations effortlessly.
- Integrated LemonSqueezy Payments & Connect for seamless transactions and a Presentation Template Store.
- Added real-time slide streaming via Vercel & WebSockets for a seamless presentation experience.
- Made sure the website met accessibility standards and complied with W3C guidelines, solving complex challenges while keeping the site easy to use for everyone.
- Implemented trash functionality to manage and recover deleted projects.
